

GET FLOORED

2014 - 2015 EDITION 01
PRO FLOORZ INTERNATIONAL Pte Ltd

WE PRESENT PROFLOORZ

ProFloorz as the name suggests is a Brand brought to you in Singapore and ASEAN market by its founders to capture the real need of customers to get Professional Floors that delight their senses.

ProFloorz draws its inspiration from the beauty of the balance in the environment. Structure and finishes working hand in hand to create living spaces that provide comfort and convenience.

ProFloorz plans to introduce its Showroom Advantage by following 3C concept... Colour... Choice... Compare. Our interactive display based on neuro-scientific research into the way in which visual recognition (eye) and engagement (brain) functionality works allowing us to show more and sell more! Furnish your floors with the best quality carpets, carpet tiles, wooden laminates, underlayers, accessories, vinyls and area rugs chosen from top-brand manufacturers, all displayed at our showroom.

The designers provide an ambient and harmonious setting to customers and present them with an enthralling finish from choicest of products from PROFLOORS catalogues.

ProFloorz Philosophy

- CREATIVE use of multitude of colours, qualities and designs to bring about the most modern finishes for our discerning customer's floors.

Mission

- A leading sales organization with a mission to build customer loyalty and excelling in customer satisfaction by offering the best flooring solutions.

Vision

- To surround the customer with delightful finishes and living spaces that thrive on a self sustaining environment.

Delivery Promise

- We strive to deliver the promise.

As your flooring specialist, five words set us apart. The Simple words are "We want you to know...."

We want you to understand and learn as much about the flooring options that we offer before you choose the floor that you would like to step on everyday.

1. Benefits of using a Carpet tile floor covering

You have the power to make your own random pattern and mix contrasting colours to spice up a space. Tiles are easy to stock, handle, install, replace and maintain.

2. Benefits of using a Nylon Carpet tile

Nylon products are tough, hard and very durable wearing materials, making it an excellent choice for heavy traffic floors. All nylon carpets are treated to incorporate stain resistant properties, colour fastness and long-lasting wear.

3. Benefits of using a Olefin Carpet tile

The next most common material used in carpet manufacturing is olefin. Olefin fibre is also durable, colourfast and is a inherently stain resistant fibre offering a cost-effective carpet product.

4. Benefits of using a PVC backed Carpet tile

PVC products take less energy to produce than many competing products, so it saves fossil fuels. PVC products are highly durable and recyclable too.

5. Benefits of using a Bitumen backed Carpet tile

Bitumen products are Eco friendly, it contains no aroma. In addition, bitumen tiles require less glue for installation and offers superior recycling compared to PVC products.

6. Benefits of using a Cushion backed Carpet tile

CushionBac™ is a high density material with excellent sound & shock absorbing capabilities, it provides superior underfoot comfort. Many of these tiles are thicker than the other backing systems.

7. Benefits of using a Laminate floorcovering

Laminate is well suited for those shoppers who want the look and feel of real hardwood but without the cost or maintenance that can be associated with natural products. Laminates are wear resistant, impact resistant, cigarette proof, scratch resistant, slip resistant and stain resistant.

8. Benefits of using a Vinyl floorcovering

Vinyl flooring is much easier to clean and much harder to stain than carpets or solid wood flooring. That makes it a great choice for family homes. It is also less likely to harbour bacteria as there are fewer areas for bacteria to hide than with other types of floors.

Inspirations

“There’s more to a tile floor than the tile itself, how you lay out your tile can change the look and feel of the room...”

Why choose Balsan?

Discover the carpet tiles by Balsan, French designer of Textile Floors, you will find our carpet tiles truly inspiring. Both creative and innovative, Balsan’s plain or design tile format continue to attract many customers looking to enhance their construction or renovation projects. As you will discover the support and expertise that Balsan can provide in the management of aesthetic, technical and decorative projects.

Quality

Superior value

A Variety of carpet tiles are available to suit your special flooring requirements. Due to carpeting your floor, the space sounds less hollow, cold rises less quickly, there is a reduced risk of slipping.

Harmony

with nature

Each carpet tile design is manufactured using recycled materials and 100% green energy, earning Balsan the EPD certification (Environmental Product Declaration).

Simplicity

Easy installation & maintenance

Easy to choose, easy to buy, easy to maintain and assemble. DIY is also an option. If DIY is not your thing, Profloorz offers Professional Installation services.

Style and Innovation

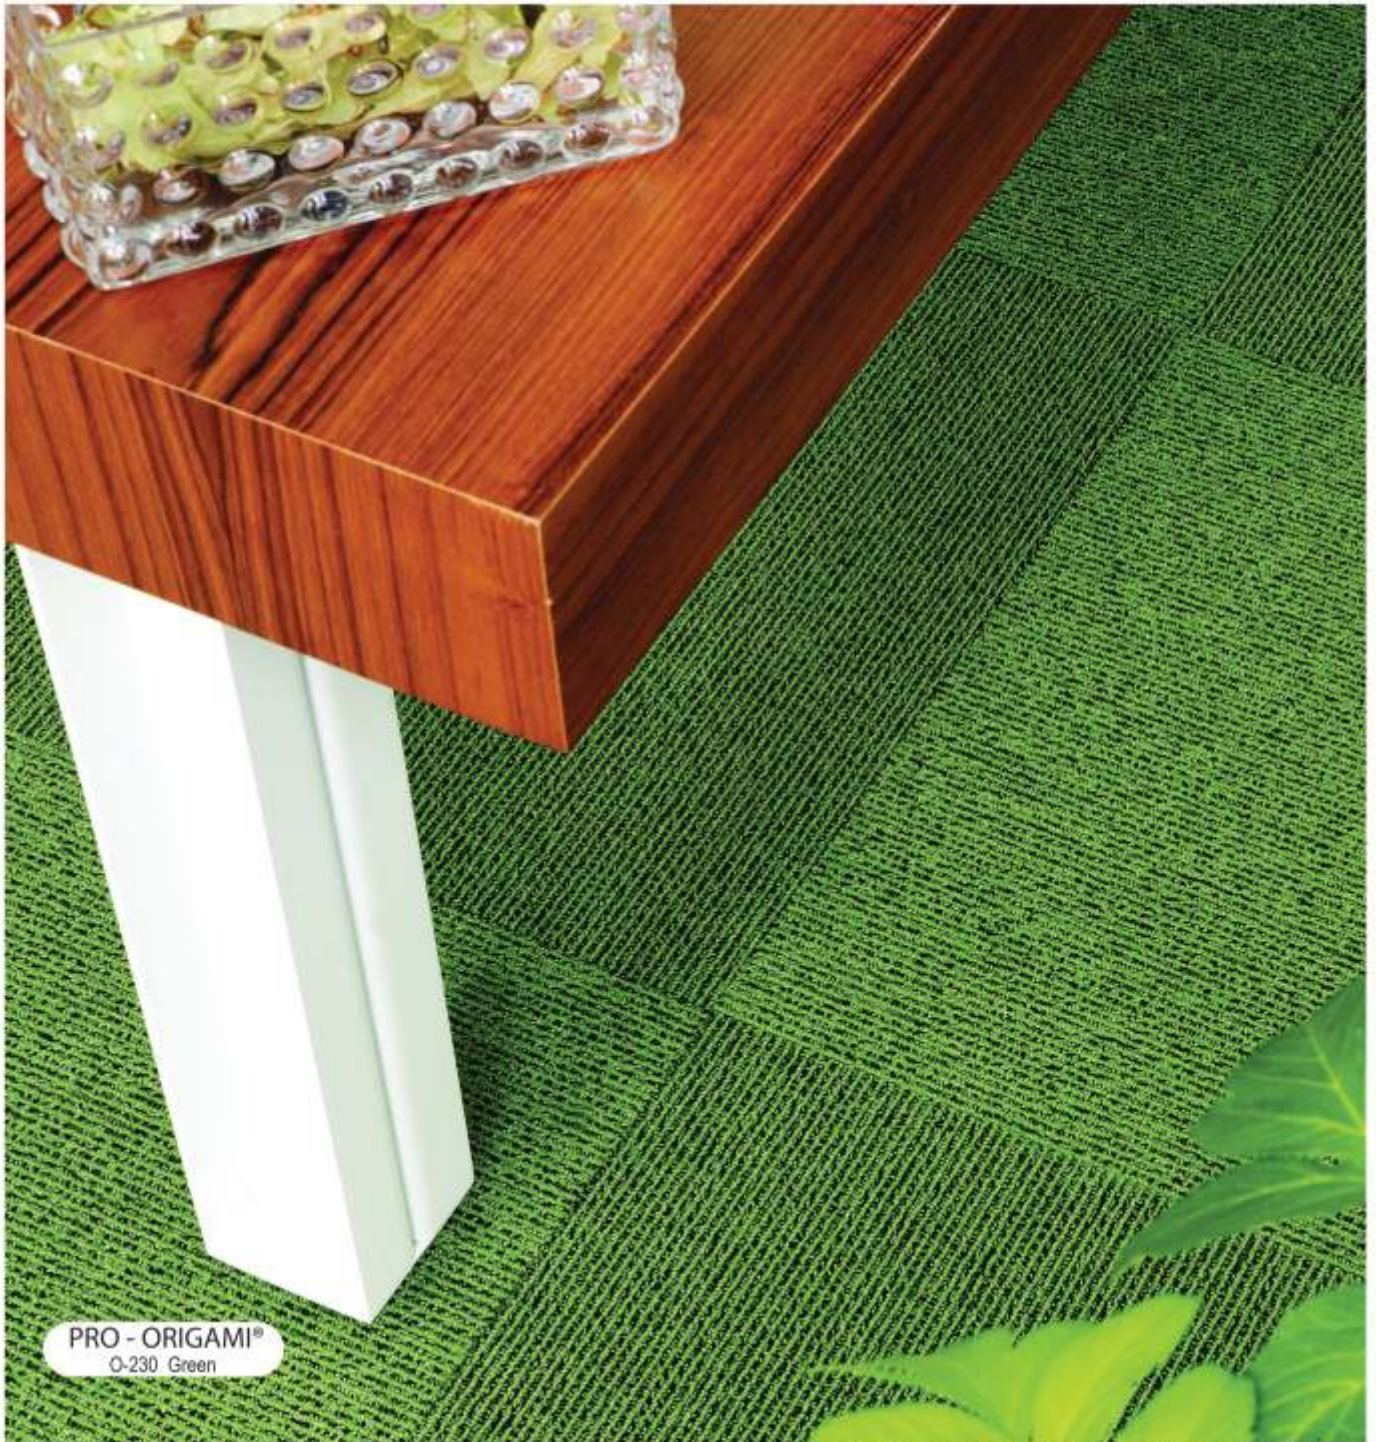

of décors, finishes and structures

Textile carpets made with new-generation fibres enjoy optimum protection against dust mites and bacteria with Balsan’s Silver Care. An innovative backing available on indent basis “Sonic Confort” provides improved underfoot and acoustic comfort.

Would you like to know more about the qualities of our Tile?
www.balsan.com

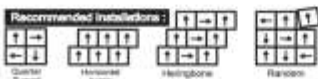

CARPET TILE / PA / Linear / 580 GSM / 17 Oz SY / ECO BAC / 50X50CM

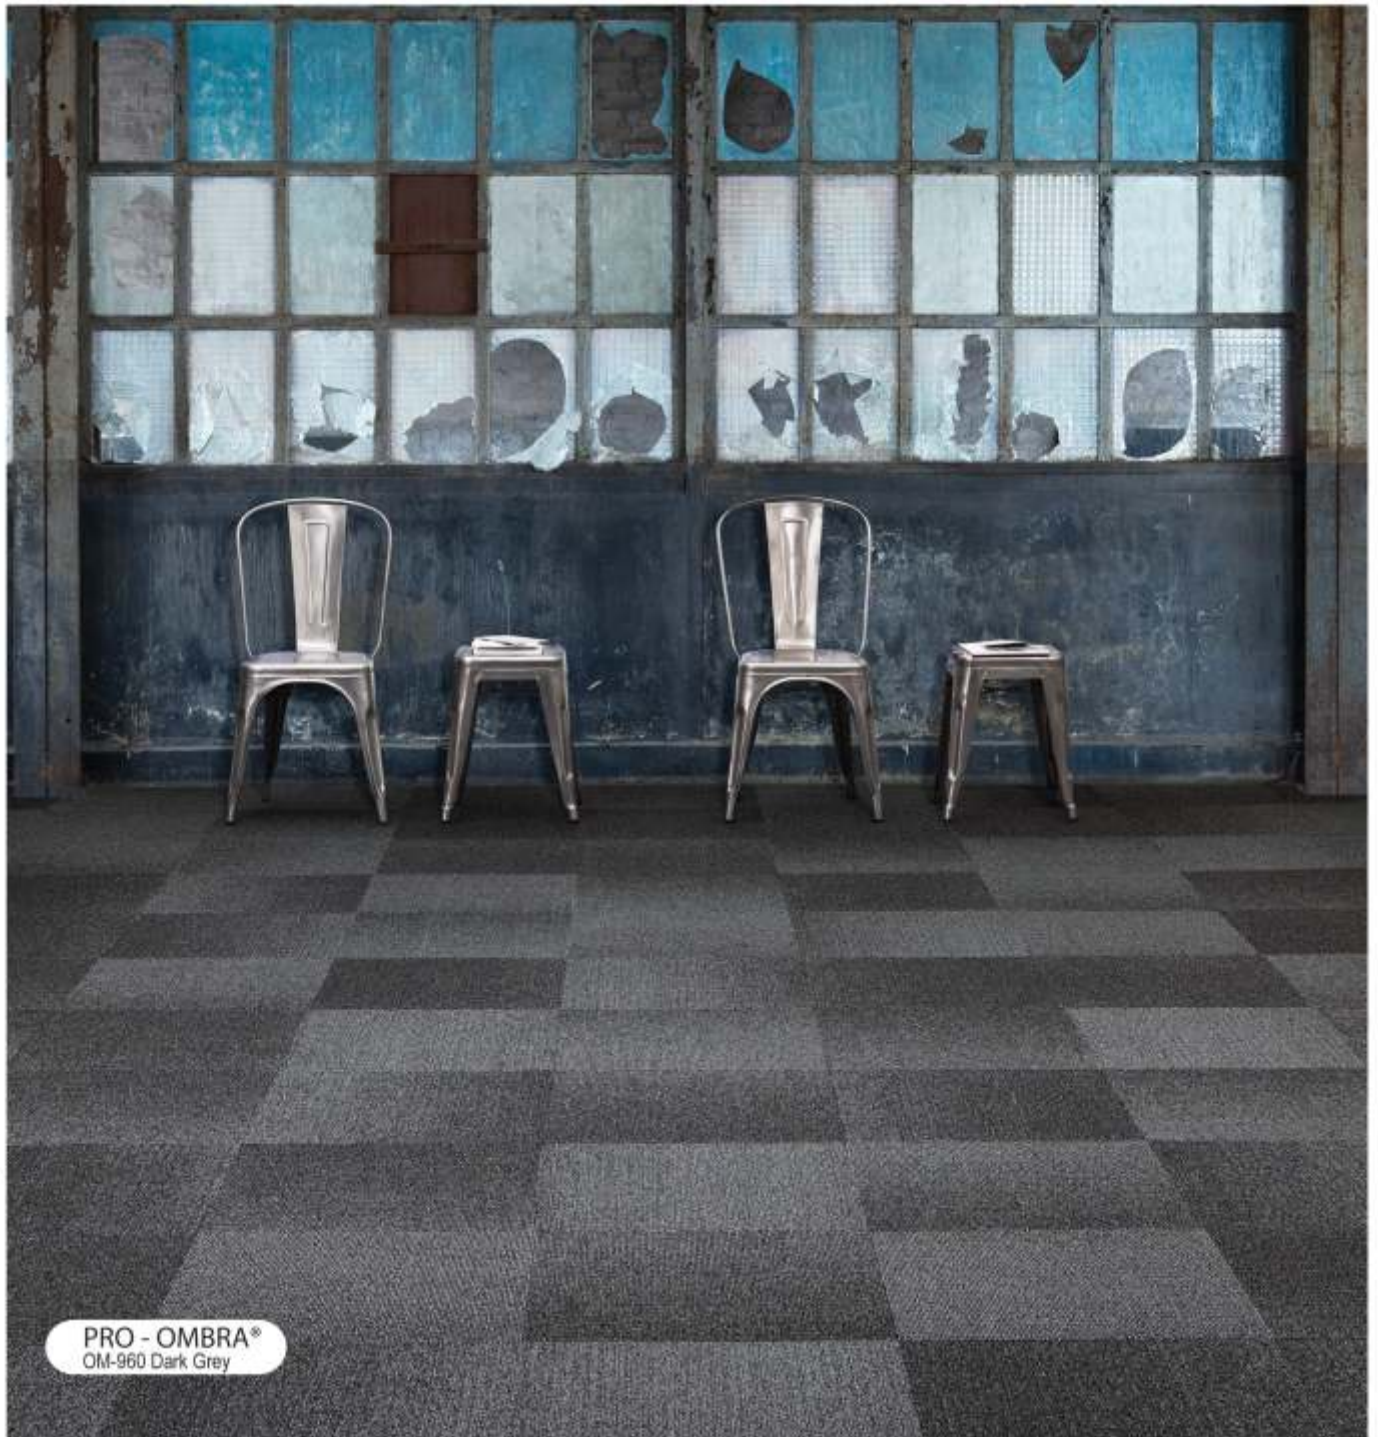

PRO - ORIGAMI®
O-230 Green

Balsan creates the event with its new PRO-ORIGAMI carpet tile. With a rhythm created by lines of colours, this carpet tile gives a dynamic atmosphere to the room. It is perfectly balanced in any set up, be it modern or minimalist.

CARPET TILE / PA / Design / 675 GSM / 20 Oz SY / ECO BAC / 50X50CM

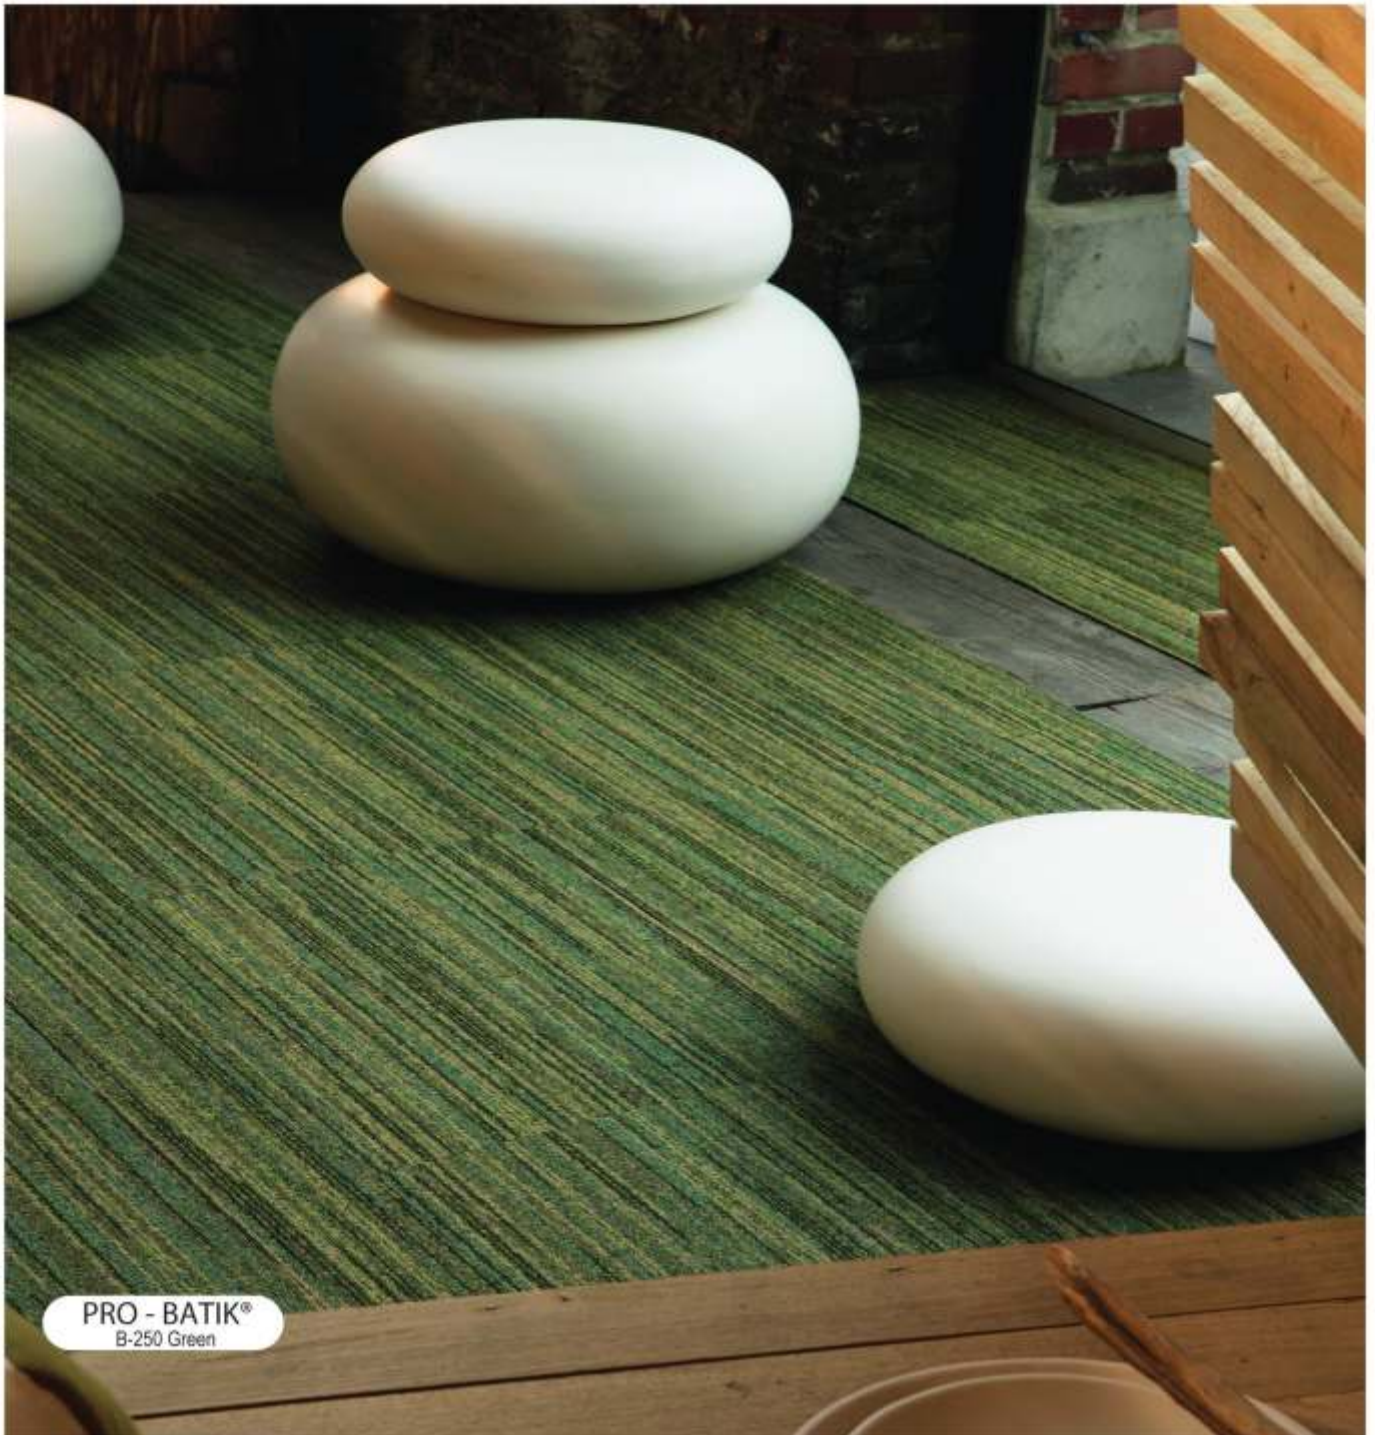

PRO - OMBRA®
OM-960 Dark Grey

PRO-OMBRA collection is made from 100 % recycled Econyl yarn by Aquafil and its design is an ideal solution for the floors of many work areas. This collection is also available with a Sonic Confort felt backing on request, for improved underfoot and acoustic comfort.

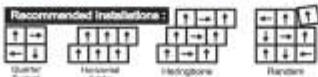

CARPET TILE / PA / Design / 580 GSM / 17 Oz SY / ECO BAC / 50X50CM

PRO - BATIK®
B-250 Green

The PRO-BATIK® carpet tile is made using Econyl 70 yarn by Aquafil, with at least 70% post-industrial waste thread. It is manufactured using 100% green energy. The pattern is inspired by traditional African weaving and is based on irregular textile lines. This collection is also available with a Sonic Confort felt backing on request, for improved underfoot and acoustic comfort.

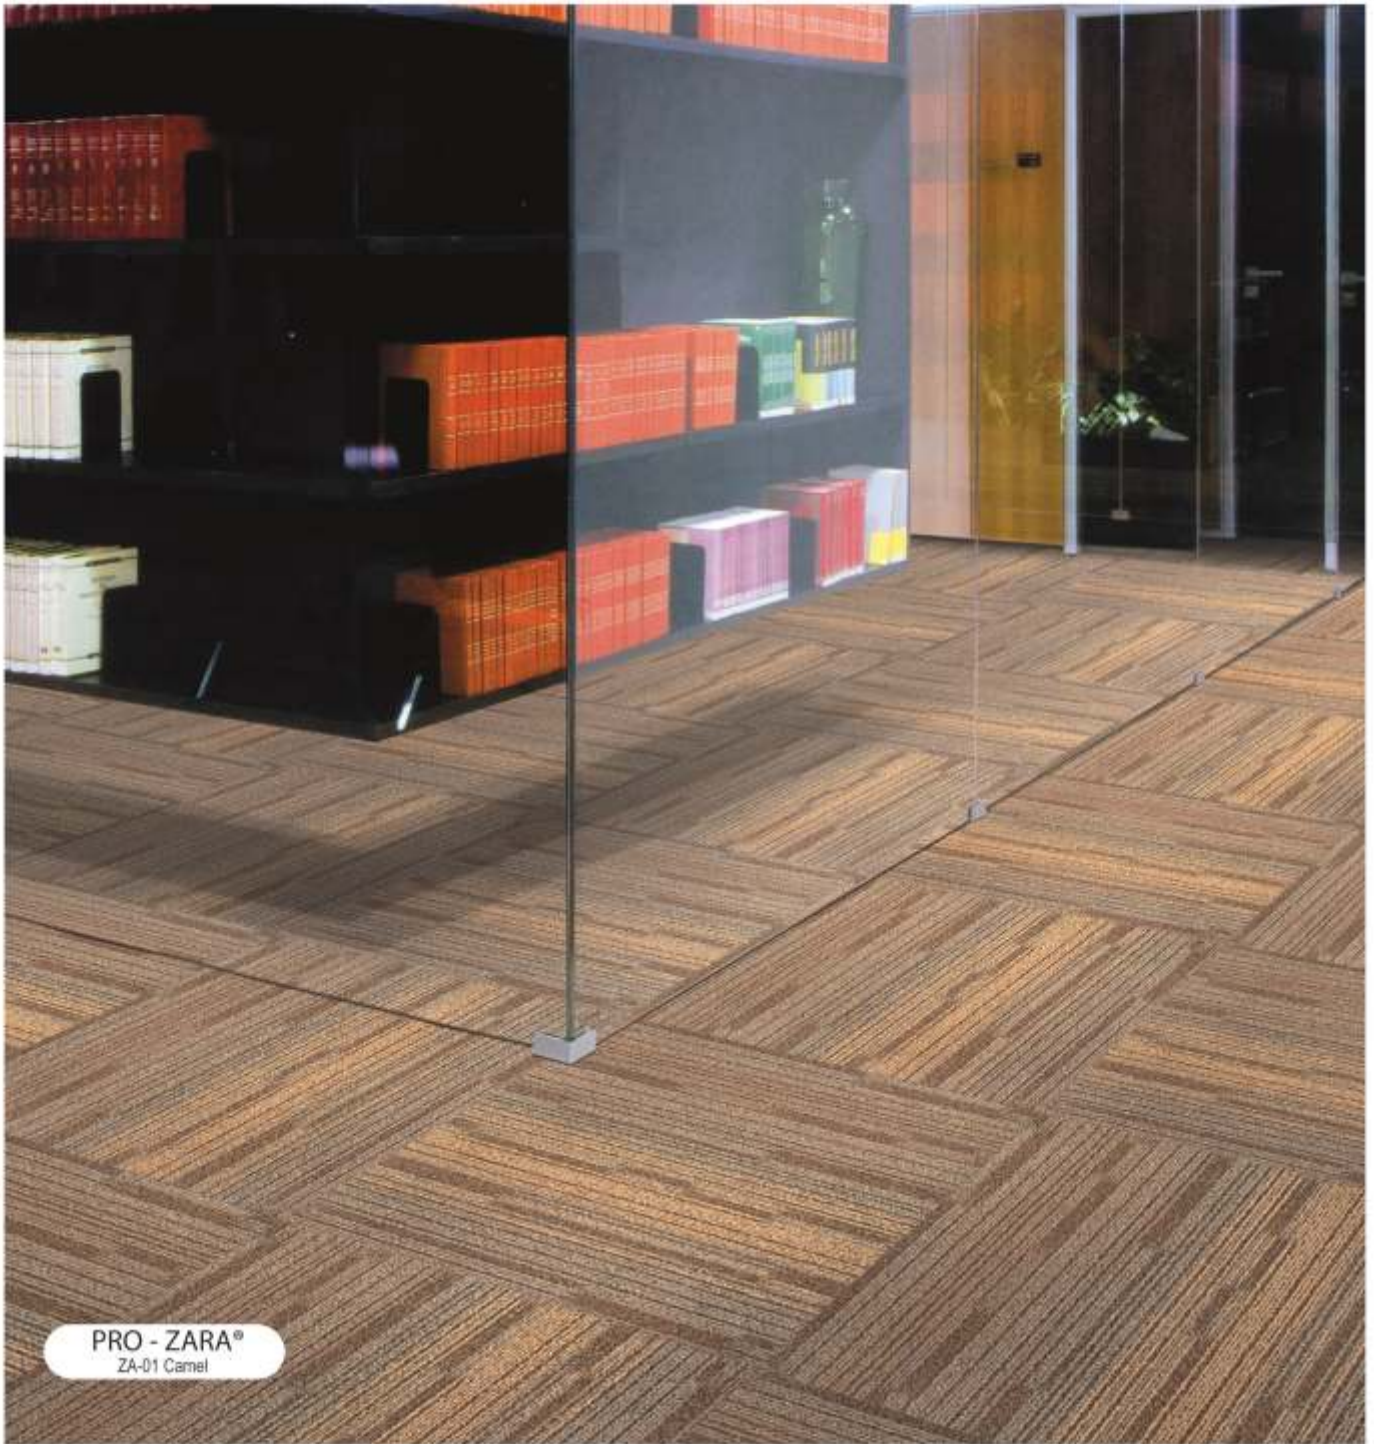

CARPET TILE / PA / Design / 750 GSM / 22 Oz SY / PVC BAC / 50X50CM

A journey in flooring, PRO-ZEST is a suitable design that creates an easy feeling. With its practical and subtle pattern working in variety of installation options, reminds us that the journey is often more important than the destination.

PRO-WALL TO WALL

Inspirations

“Carpet is a great decorating element.....
you can count on it having a big impact on the look of the space....”

Why Choose Wall to Wall Carpet?

Here's a list of reasons why carpet should be your choice for a perfect floor :

- Carpet adds warmth and is soft under feet and easier on children's knees.
- Carpet is much quieter than hard floors.
- Carpet comes in a wide variety of colours, tones and designs.
- Carpet can hide many sub-floor irregularities that would not be permitted with hard surface floors.

Quality

Superior value

Carpet comes in every color, texture, and design imaginable, with prices to fit most budgets. It takes the chill out of cold floors, softens hard surface, and soothes the home environment. For the elderly and children, it provides a safe, nonslip surface.

Harmony

with nature

It has been found though that carpeting is not only aesthetic and affordable but is also a great way to save some energy. The use of carpet in wall to wall application actually increases the R-value, and keeps the room much warmer during winter months.

Simplicity

Easy installation & maintenance

Installing new carpet not only enhances the beauty of a room but provides insulation, sound control, and a comfortable surface to walk on. Seamless installation is possible because of the large dimension of a carpet roll.

Style and Innovation

There is a much greater choice with carpets than with any other floorcovering when it comes to making a fashion choice for your home decor.

Different types of carpets :

Axminster

Wilton

Loop pile

Cut pile

Cut Loop

“Area Rugs”

What can an area rug do for your home? Just about anything! Area rugs are interior design necessities, as they can define, decorate, complement and emphasize room design and furniture. Take a look at any interior design magazine or decorator's portfolio – nearly 90% of the rooms use area rugs to pull together the decor.

Axminster weaving has been traditionally used for creating multicolored patterned carpets and the most complex and intricate designs can be created with pinpoint precision designed to withstand the wear and tear that is often associated with high traffic areas.

The traditional carpet fibre, wool has been used in the making of carpets worldwide for hundreds of years and there's a good reason why. Properties include excellent appearance retention so that wool carpets spring back into shape, good resistance to soiling, low flammability and wool is easy to clean too. Other benefits of Axminster carpet includes sound absorption, pattern clarity, high definition, flame resistant, static, mildew resistant and excellent durability.

Loop Pile :

A durable, long-wearing pile that has been engineered for high traffic areas and ideal choice for commercial sectors. Usually not preferred in residential settings where there are children or pets. Advantages: Commercial loop carpets are very durable, won't show footprints and easily hides dirt. It is one of the easiest carpets to vacuum.

Cut Loop Pile :

Cut loop has a sculptured appearance created by cutting some loops, while leaving others uncut at the same or lower level. This combination style, produced on state-of-the-art machinery, has a sophisticated, well-defined look, a soft feel and many different designs. The various heights can be random, or they can be arranged to create a distinct pattern.

Cut Pile :

Cut pile is achieved by cutting the tops of the loops so they stand upright and form an even surface. Plush pile carpets are made of dense and lightly twisted fibre, providing a smooth velvet or velour finish for that luxurious look. They are the Softest carpet available, deep, luxuriant thickness cradles feet in rich comfort.

Wilton carpets produce high quality cloth in either plain colors or patterned, in a limited number of colors. In this type of weaving, the pile and the backing materials are closely interwoven. In patterned Wilton, the pile yarn not appearing on the surface is woven into the backing, thus producing a very firm and dimensionally stable material. Wilton carpets are known for its strength and durability and is a popular choice for commercial areas as it can stand up to high traffic. Patterned or sometimes solid color, Wilton carpet is often used on airliners and passenger trains as in hotels and residential applications.

B-tron[®]
stain resist

Bleach Cleanable

SHADING
The use of all color stain resisting results in random pile reversal (shading and lightening). This is not a manufacturing defect, but an inherent characteristic of all fine carpet qualities.

PRO-FLOORING ACCESSORIES

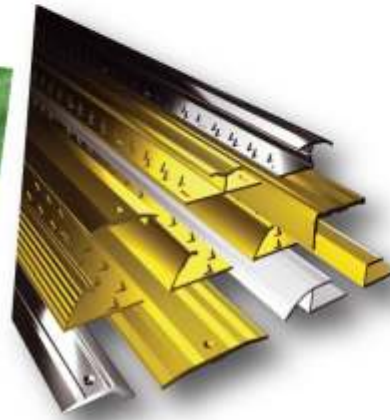

Inspirations

“Save your floor....by adding underlayer and accessories”

Why choose Interfloor Underlayer ?

Although seen as an additional expense, by installing underlay you will extend the life of your carpet or laminate floor. A Good underlayer gives improved underfoot comfort, increases appearance retention, absorbs the pressure of foot traffic and increases sound insulation.

Why choose Interfloor Accessories ?

Carpet trims/accessories are some of the most useful tools often overlooked. They actually help to keep the floor covering in place and prevent slippage that can make a room look messy and present a safety hazard to those who walk through the room.

Quality
Superior value

Underlayer :

A Good Underlayer will improve underfoot comfort.

Accessories :

Metal accessories are more durable and hard wearing compared to wooden ones.

Underlayer can be installed beneath any floor of your office or home

When customers want the ultimate brand in underlayer luxury many of them ask for Tredaire and Duralay, renowned for its underfoot comfort and adding warmth and cosiness to any room.

Why do I need underlayment? Underlayment is equally important for the following reasons:

1. To smooth out any undetected rough edges, small dips or rises in the subfloor.
2. To make the floor softer to walk on.
3. To provide sound insulation.
4. To provide protection against moisture.
5. To prevent problems in the future due to settling.

love your floor®

Pro - Grippers

Carpet Grippers are fixed around the corner perimeter of each room. The carpet is then stretched off and the gripper gives the carpet an extra holding strength against wrinkles that could happen on a large area of room.

Pro - Heat Seaming Tapes

Any seams in the carpet may be joined using Heat Seaming Tapes. These tapes hold together both sides of the carpet and thus avoiding carpet joints opening up easily due to heavy foot traffic.

Carpet trims/accessories are some of the most useful tools often overlooked. They actually help to keep the floor covering in place and helps prevent slip page that can make a room look messy and present a safety hazard to those who walk through the room. There are a big variety of solutions and options that are easy to install and some that are a bit more complicated. Some accessories are designed to bridge the expansion gap, some are to conceal and protect joints between all grades and thickness of floor coverings and some are designed to give a clean and smart finish to protect the floor you choose to walk on.
